

17. The animal feed additive of claim 16, wherein the protease has an amino acid sequence that has an identity of at least 90% to SEQ ID NO: 1.
18. The animal feed additive of claim 17, wherein the protease has an amino acid sequence that has an identity of at least 95% to SEQ ID NO: 1.
19. The animal feed additive of claim 18, wherein the protease has an amino acid sequence of SEQ ID NO: 1.
22. An animal feed composition, comprising a crude protein content of 50-800 g/kg and at least one acid-stable protease that has an amino acid sequence that has an identity of at least 70% to SEQ ID NO: 1.
25. A method for improving the nutritional value of an animal feed, comprising adding an animal feed composition of claim 22 to the animal feed.
28. A method for improving the nutritional value of a vegetable protein, comprising adding at least one acid-stable protease to the vegetable protein or protein source, wherein the protease has an amino acid sequence that has an identity of at least 70% to SEQ ID NO: 1.
